Details of Event

World is a stage and we all are actors. All we could do is to perform the best of it. Being so much indulge in this temporary world we let go so many things that requires our attention. Considering this as a responsibility. Dramatic Society of Department of Computer Science and Software Engineering have come up with the intentions to bring forward the little details of life that need our attention and aims to indoctrinate the positive cultural heritage. This is a little departmental effort to promote extracurricular educational messages. With students in the leading line.

The Event named “Business Snap Shot” that held on 22 August 2019 that was organized under great efforts of Dramatic Society was no less than a perfect blend of talent showcase and captivating plays in the context of organization. With the clear perspective of presenting a bigger picture of ethics as individualistic, unchanging, and impervious to organization. A depiction of communication loopholes and the low level of ethics in the business environment. Going round from how Undeserved Hiring and preferential treatment has been dragging down the well-deserved talent. With the “Enemies within the organization” that is a clear loss of group efforts or understanding in between. Where there eventually produces communication loop holes. And all that suffer is organizational progress. With all these factors all that matters is communication skills. Either that is in between product launch or day to day premises. The better the person has the ability to communicate the bigger opportunities would be attracted. Being under the circle of Information Technology. Students even bring this into discussion about how Information Technology could be a breakthrough in their professional life. One of the plays had the perspective of picturing the fraud in the organizations.

On summarizing the discussion. Business Snap Shot was a complete effort of Dramatic society and the head Ms. Saba Rizwan, which proved to be the avenue of expression for students.
