Details of Event

Purpose:

On 4th and 10th August, 2018 session on GitHub was conducted which had the motives of scaling student's knowledge over GitHub which is web based hosting service. This session was organized for the better understanding and knowledge of final year students about the vast hosting and collaboration platform. A friendly and interactive session environment were being created to make assurance of the clear understanding of the topic being discussed. Initially the participants level of awareness were gauged which helped revealed the knowledge of participants.

Scope:

The focus of session was repositories, branches and commits. At this session focus was being made on practical implementation for the clear learning. And hence participants were made to implement their learnings of sessions on their computer systems or laptops.

Beneficiary:

In this session, speaker enlightened about how GitHub could be the source of version control and collaboration. And about how this service helps individuals to work on the same project besides being at different places. To make the discussion more worth full. More features were being highlighted including bug tracking, feature requests, task management. This two day event had aim to leave no queries unanswered regarding GitHub services. As students can avail services of GitHub for their ongoing final year projects and even in life after university.
