## PROJECTS

### DR. REMOTE

Dr. Remote is an innovative healthcare monitoring system with a dynamic website built on PHP and MySQL. Users can access information about doctors, departments, and hospitals. For appointments, the application, developed in Android Studio using Java and MySQL, allows users to log in, sign up, and book appointments. The app features call and chat options for remote consultations. Additionally, an IoT device measures vitals like blood pressure and oxygen levels, with the data seamlessly integrated into the MySQL database for each patient. Dr. Remote revolutionizes healthcare by providing convenient and efficient remote monitoring, addressing the

challenges of traditional healthcare systems and ensuring reliable access to healthcare services.

## **AUTOWORLD**

Auto World is a static website leveraging HTML, CSS, JavaScript, Bootstrap, and jQuery to showcase and compare various car brands and models. Users can explore detailed information, including specifications and features, enabling seamless comparison. With a responsive design and interactive elements, Auto World offers a user-friendly platform for car enthusiasts.

## **E-BOOK**

eBook is a dynamic custom website developed on Core PHP, HTML, CSS, JavaScript, Bootstrap, jQuery, and MySQL. This platform caters to users looking to purchase books through a streamlined billing system. Subscriptions are available with various packages, and users can engage with the admin through a chat feature. The site includes a comprehensive user and admin panel, allowing participation in story competitions with subsequent result announcements. Users can log in, sign up, and choose between hard or soft copies when buying books.

## CAREER OBJECTIVE

Finding a stimulating opportunity to demonstrate my talents and abilities and work in a progressive environment with better opportunities, career growth and professional development.

## EDUCATION

DECEMBER 2022

**BACHELOR IN SOFTWARE ENGINEERING**, JINNAH UNIVERSITY FOR WOMEN

MAY 2018

**INTERMEDIATE IN PRE-ENGINEERING**, GOVT. DEGREE GIRLS COLLEGE BLOCK M

APRIL 2016

**MATRICULATION IN COMPUTER SCIENCE**, THE TIMES SCHOOL

## TRAININGS / INTERNSHIPS

DECEMBER 5 – PRESENT

**FLUTTER DEVELOPER**, DIGITECH INFRA ASSOCIATES

Building mobile application's using dart

SEPTEMBER 21 – OCTOBER 27

**WORDPRESS DEVELOPER**, CLICKWRAP

Build websites using WordPress.

Write coding using HTML and CSS.

## PROJECTS

2022

**TRACK INWAY**

Track InWay is based on indoor navigation, with some additional features. One of our feature will include a complete sample form along with a list of essential materials. Another feature is class/lab availability, which will scan a specific class/lab and provide current information.

2022

**BYTE FOOD**

We used Android Studio to develop the mobile app, which has some basic features.

2020

### **AUCTION**

Buyers can put bids at any moment throughout the auction at the auction center. Buyers can look at the products in the selling center and then place a bid during the auction. The firm reviews all of the products at the end of the auction and marks those that have bids larger than the reserve as sold. Any items sold will be subject to a fee of 10% of the final price to be paid to the auction house.

2019

### **CENSUS MANAGEMENT SYSTEM**

We used the JAVA programming language to create this system. Basically, we built this method to compute the population of a specific area in order to reduce paper effort.

2019

### **SACK AND THE CITY**

The PYTHON programming language was used to create this system. The goal of our project is to verify the weight of sacks, take an order for the required weight of each sack, reject orders that are above or underweight, and finally, give a discount to customers who order more than 2 sacks.

2019

### **CAR FREAK**

The goal was to create a website that would inform us about various car brands.

A database management system implemented on MS Access.

### **SunLe, SEMESTER PROJECT**

A music streaming website implemented using HTML, CSS, Bootstrap, JavaScript and PHP

## SKILLS

- Web development- HTML, CSS, XML, JavaScript, Bootstrap, PHP, WordPress, ASP.NET C#
- Database Systems - MS SQL, MS Access, MySQL
- Adobe Photoshop, Adobe Illustrator
- Mobile App Development- Native Android Mobile app development using JavaScript through Android Studio

## ACTIVITIES

- I was a student member of IEEE JUW Student Branch and IEEE JUW WIE Student Chapter of my university (2020-2021). I had volunteered in many activities conducted by the branch as a part of event organizing team. Following are the leadership positions I held in the Executive Committee of the branch during my membership tenure:
  - Chair, IEEE JUW Student Branch (2020-2021)
  - Chair, IEEE JUW WIE Student Chapter (Jan 2020 – April 2020, 2021)
  - Affinity Group Secretary and Affinity Group Treasurer, IEEE JUW WIE Student Chapter (2020)

- I had contributed in a week-long virtual event IEEE Singapore Festival organized by the IEEE Young Professionals Singapore and IEEE Women in Engineering Singapore affinity group held in 2020 and 2021.
- I had volunteered in JTech 19' and JTech 20', a technology extravaganza organized by Department of CS and Software Engineering, as a part of event management team.
- I had an honor to showcase my FYP at JTech 21' event and NIB (National Idea Bank), a collaboration to identify and build a repository of innovative ideas for recognition and support, inaugurated by the President of Pakistan, Dr. Arif Alvi.

## **NETWORKING**

Organizing IEEE JUW SATURDAY WEBINAR SERIES have taught me a lot from learning to conduct webinars, getting hang of pre and post event responsibilities, polishing my professional communication skills to interaction with National and International Speakers and building my network along the way. Some of the notable speakers that I have the honor to interact with:

- Mr. Mirza Aijaz Ather, CEO, Eggshell (Pakistan)
- Prof. Dr. Celia Shahnaz Chair, IEEE Bangladesh Section (Bangladesh)
- Dr. Supavadee Aramvith, Region 10 Section & Chapter Committee Chair (2020) (Thailand)

## Courses

Object Oriented Programming

Data Structure and Algorithms

Database Systems

Software Quality Assurance

Software Project Management

Artificial Intelligence

## **Technical (IT) Skills**

Languages : HTML, CSS, Java, Python, PHP

## **Final Year Project**

The final year project on which I am working is named as JUW ORIC MANAGEMENT PORTAL, it is a portal in which we give many facilities to its users such as query posting, submitting documents, viewing and creating profile . For the development of this project me and my final year project group members choose Laravel a frame work of PHP ,because it gives too many built in functions. We produced three deliverables of this project which are web app , mobile app and website, for the designing of project we used bootstrap , html and CSS and for the mobile app we used the approach of APK instead of developing a mobile app.

## **Semester Projects**

Criminal Record System in Database Systems

Color Sorter Using Arduino

Website Development of Jtech

Aquaphonics

## **Soft Skills**

Communication, Team Work, Confidence, Problem Solving, Flexibility, Self Management, Time management

## Semester Project's Details

## Final Year Project

<p>My final year project name is Augmented Realm in which I used the augmented reality technology. In the project there is 2 modules, 1) Education and 2) Smart Notice Board</p> <p>In educational part the core objective of augmented realm is to inspire learners to study at their own by creating books more interactive. Augmented Realm has developed diverse applications which offers description in Urdu, explanations with animations, quiz after each segment and overall result that shows learners their evolution. Originally augmented realm has covered four different course book which comprises: Ilm-e-Deen Nizam Education Society Registered (Islamiat), Countdown Second Edition Oxford (Mathematics), Aao Bachon Urdu Seekhain by Qamar Ahmed Ali Khan (Urdu) and Computer Science for Class 9 (Sindh Textbook Board Jamshoro). For implementing augmented reality we have used Unity 3D software and for quizzes along with their result we have used Android Studio. In the last phase we have merged these applications to provide one single application for user.</p> <p>In Smart notice board, augmented realm had implemented augmented reality on university notice boards such as users will transfer their mobile camera to any AR marker of that notice board and all the information of everything existing on the board will appear via augmented reality. Entire AR objects of Smart Notice board has been kept in database for which Admin panel is developed. The AR objects for any AR marker can be updated through Admin panel.</p>
